

# Service partner wanted

**We are commercially involved in the production and supply of Systems and equipment for ships, yachts and sport boats, including platform lift systems, cranes and other electro-hydraulic systems and equipment.**

**Delivery is made mainly to shipyards that carry out the corresponding installation/assembly themselves.**

**If additional after-sales work has to be carried out that we are not able to carry out ourself, we intend to assign such work to the contractor by means of a separate agreement.**

**For this purpose, we are constantly looking for new service partners worldwide.**

**Are you interested, please scan the QR code?**
